

1CRM CUSTOMER CONNECTION

Customer Portal Plugin for WordPress

The image shows a smartphone displaying the 1CRM Customer Connection mobile website. The mobile site has a clean, modern design with a teal header and footer. The main content area features a large "How can we help you today?" heading, a search bar, and a grid of articles categorized into sections like Customization, Documentation, General, Products by 1CRM Systems, Getting Started, Startup Edition, and Videos. Each article card includes a small icon, a title, a brief description, and the number of articles or topics.

Background

A principal goal of any business should be to connect more closely with its customers. When you are in close contact with your clients, when it is easy for them to interact with you, and when this relationship consistently delivers for them over time - that's when you gain customer loyalty.

If you use a Content Management System (CMS) to create your website, and most organizations do, then you'll know that WordPress dominates that market. So when we set out to make a system that would let businesses connect with their clients easily, often, and intimately via their website, we needed to build it for the WordPress platform.

The *1CRM Customer Connection™* is a WordPress plugin that enables your clients to interact with your business at any time of day, all by themselves. Studies show this increases customer satisfaction, and reduces administrative costs - what's not to like?

You can implement this on your WordPress website by yourself using this Guide, or you can have us do it for you. Either way it allows your clients to connect with you in these ways:

- Login
- Get Help, by Searching a Knowledge Base
- Review and Create Service Cases and Software Bugs
- Review, Print and Approve Quotes
- Review Invoice and Payment History, Download Copy Invoices, Pay Invoices
- Interact on Projects - Upload & Download Documents, Check Progress
- Review and Update Their Contact Info
- Make GDPR Personal Information Requests
- Create and Manage Subscriptions

If you're excited to get these kinds of capabilities working for your organization, keep reading, or just [drop us a line](#) and we'll demonstrate what it can do for you!

1.0 Welcome

The *1CRM Customer Connection* is a customer self-service portal for WordPress, which links to your 1CRM core CRM system. If you have a WordPress-based website, your WordPress administrator can install the Customer Connection WordPress plugin, configure how you want to present the portal features to your clients, and your website will gain a wide range of features that enable your clients to work with you more easily and efficiently.

What's a customer self-service portal? It's just a website, or a set of features within a larger website, that enables customers to privately and securely perform useful transactions from simple account updates to paying bills, approving quotes, searching for support information, booking appointments, managing support tickets, exchanging documents and more. It enhances customer relationships by providing complete 24x7 access to up-to-date information.

If you have a website built using WordPress, and if your business would benefit from the kinds of features mentioned above, then the *1CRM Customer Connection* is something you should have a look at. You can see a demo system running [here](#).

1.1 Additional Documentation

The 1CRM Customer Relationship and Business Management (CRBM) system offers extensive documentation for the installation and use of its various components. Click on any link below to download that document, or click [here](#) to see all our 1CRM documentation:

- [User Guide](#)
- [Mobile User Guide](#)
- [Implementation Guide](#)
- [Developer Guide](#)

2.0 Plugin Installation & Administration

2.1 *Installing the Plugin*

➡ 2.1.1 Before You Start

If you are using [wordpress.com](#) to host your website, then you cannot install plugins.

We often get reports from [wordpress.com](#) users saying that they can't see the plugins menu in their WordPress dashboard. It is because [wordpress.com](#) has [many limitations](#).

You cannot install plugins on [wordpress.com](#) unless you upgrade to their business plan. On the other hand, you can install any plugin you want on a self hosted WordPress website right out of the box.

➡ 2.1.2 Installing the WordPress Plugin

You begin by downloading the *1CRM Customer Connection* plugin here: [Download Plugin](#)

Note: The 1CRM Customer Connection is commercial software which must be licensed. While you can download and install the plugin freely, it will only function properly when connected with a 1CRM Professional or Enterprise Edition system version 8.6 or later, which must include a subscription to the Customer Connection portal. The 1CRM Customer Connection requires PHP 7.1 or later to function properly, and WordPress itself recommends a minimum of PHP 7.

Next, you need to login to your Wordpress site as an administrator and install the plugin. Within the WordPress admin area visit the *Plugins* page and click on the *Add New* button.

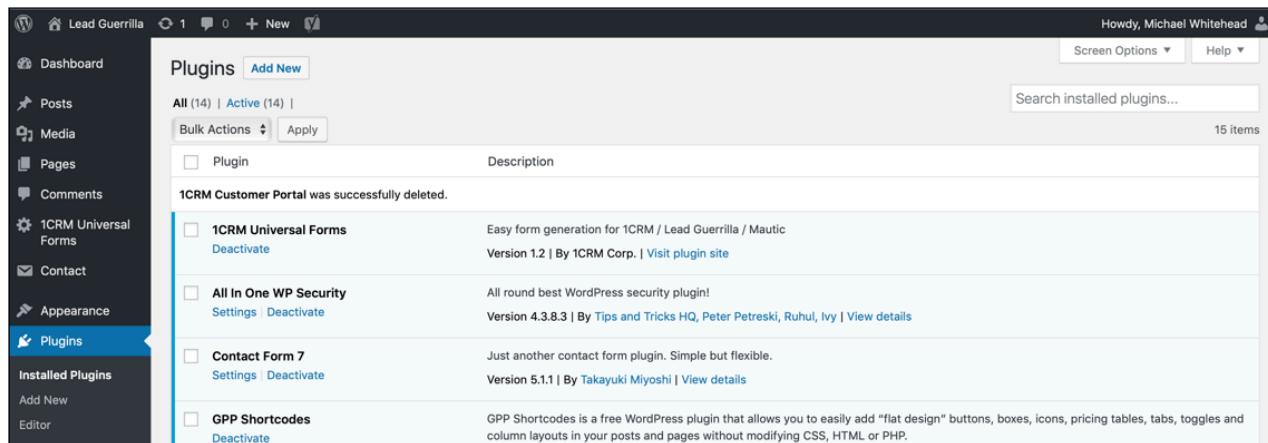

Figure 1: WordPress Administrator: Add New Plugin

After that, click on the *Upload Plugin* button at the top of the page.

1CRM CUSTOMER CONNECTION

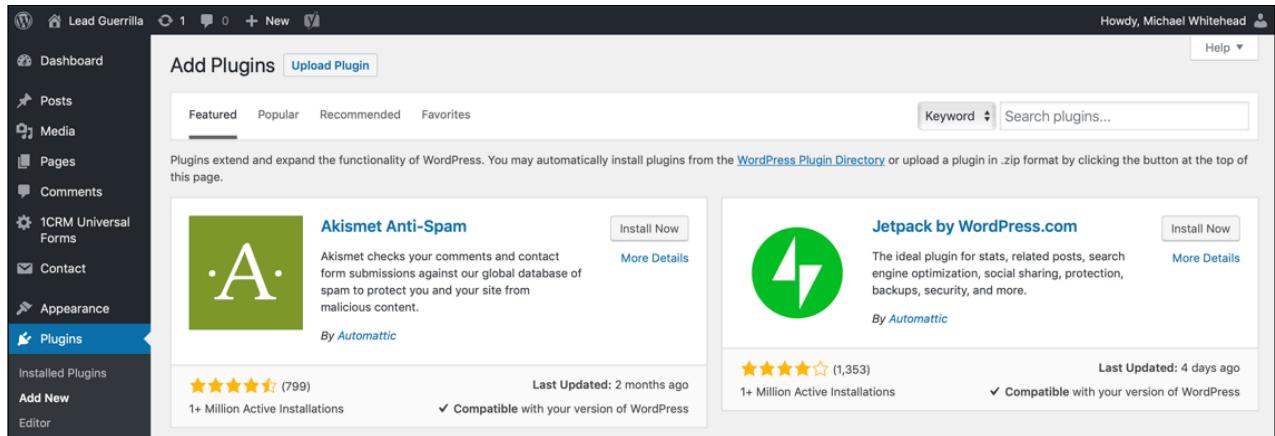

Figure 2: WordPress Administrator: Upload Plugin

This brings you to the plugin upload page. Click on the *Choose File* button and select the plugin file you downloaded earlier.

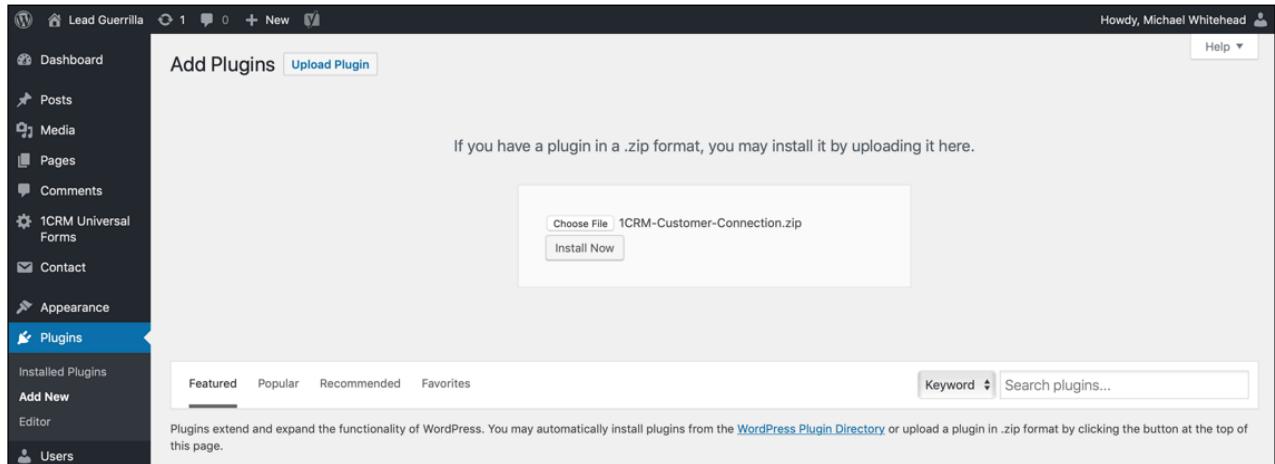

Figure 3: WordPress Administrator: Install Plugin

After you have selected the file, you need to click on the *Install Now* button.

WordPress will now upload the plugin file from your computer and install it for you. You will see a success message like this after the installation is finished.

1CRM CUSTOMER CONNECTION

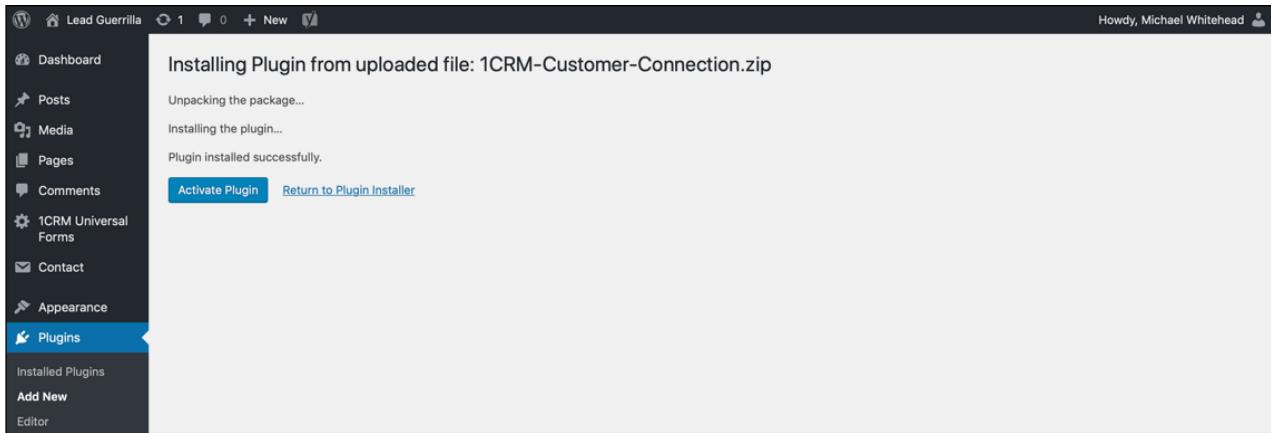

Figure 4: WordPress Administrator: Plugin Installed

Once installed, you need to click on the *Activate Plugin* button to start using the plugin.

Once you do that, you can see the 1CRM Customer Connection on your list of installed plugins:

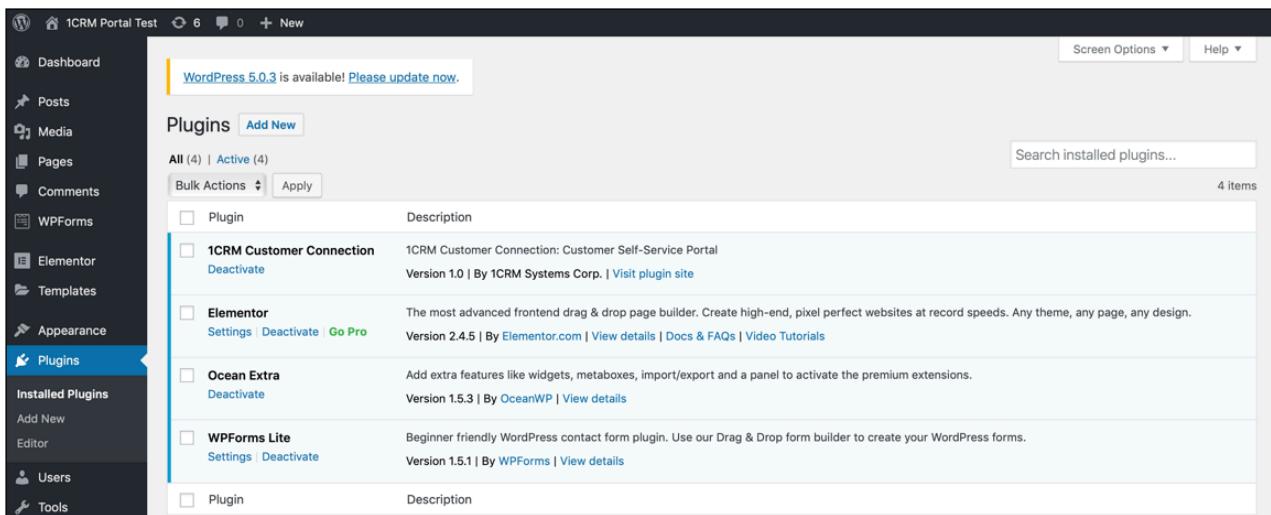

Figure 5: WordPress Administrator: Plugins List including 1CRM Customer Connection

As well, you can see the 1CRM Customer Connection configuration menu options on the left side in the Admin menus:

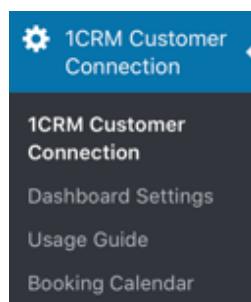

Figure 6: WordPress Administrator Menus for 1CRM Customer Connection

2.2 Plugin Configuration

2.2.1 Setting up the API Link with 1CRM

1. In 1CRM, enable the REST API (see 1CRM Implementation Guide Section 7.11.1). You may also choose whether or not to *Allow API calls via insecure connections* (`http://`). We recommend you don't.
2. In 1CRM, go to *API Clients* in Admin (see 1CRM Implementation Guide Section 7.11.2), and create a new API Client. Give it a name, and set *Enabled Grant Types* to *Client Credentials*. Make sure it is *Enabled*, and select a user. Requests from the 1CRM Customer Connection will be executed on behalf of the selected user. Save the record, then click the button provided to change the *API Secret* (see figure below). Take a note of the *API Secret* and the *Client ID*.

The screenshot shows the 'API Clients' list screen in the 1CRM admin interface. A single client record is displayed:

- Name:** onecrm_portal
- Type:** 1CRM
- ID:** d40f99c2-cc04-21e2-41b1-5c3ce522e19a
- Enabled:** Yes
- Is Public:** No
- User:** admin
- Description:** testing 123
- Created:** 10 minutes ago
- Modified:** Moments ago

Figure 7: Creating an API Client in 1CRM

Now select the 1CRM Customer Connection in the WordPress Admin menu, and enter the URL of your 1CRM system (with `/api.php` appended, to address the 1CRM REST API), as well as the *API Client ID* and *API Secret* you noted in the previous step (not the example values you see in the Figure below!). Click on *Save Settings* when you're done.

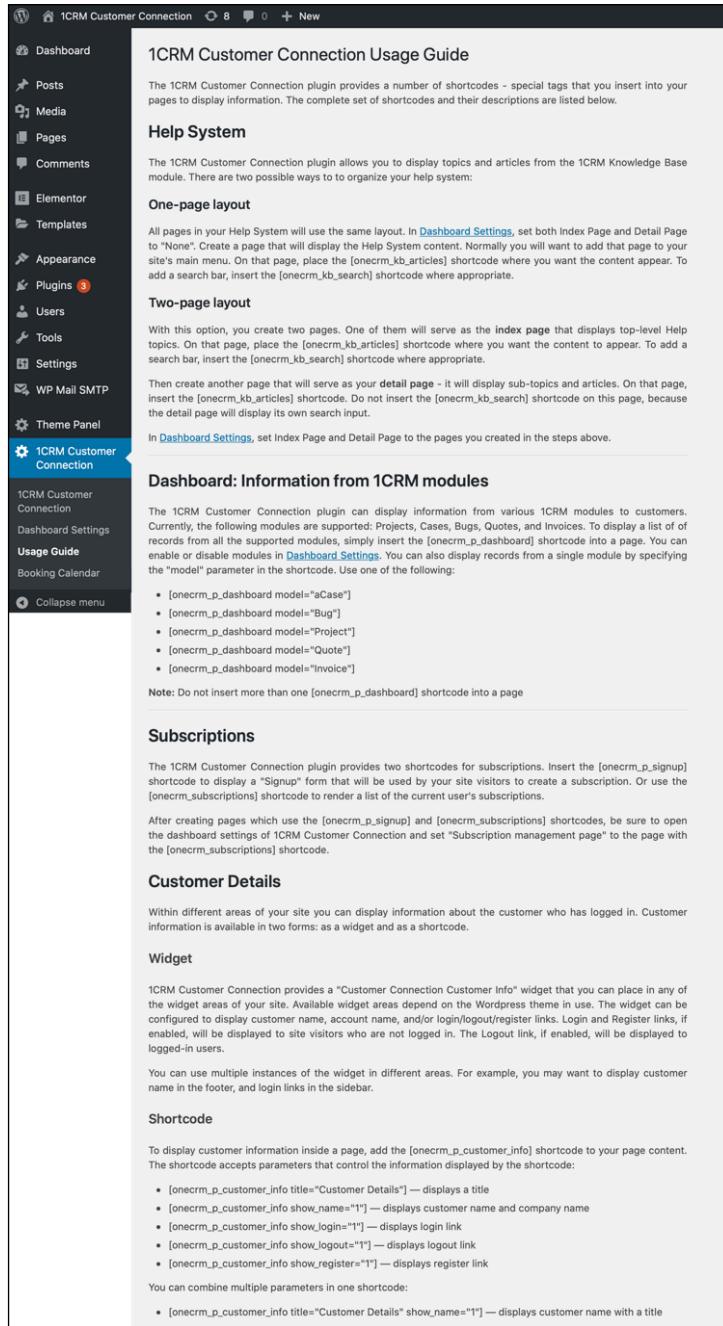

The screenshot shows the '1CRM Customer Connection Settings' page in the WordPress Admin menu. The settings are:

- API URL:** https://booking.1crmccloud.com/api.php
- API Client ID:** 3150d88b-b4e3-3080-9b66-5e020d7e34d0
- API Secret:** 1q2w3e

Figure 8: Configuring the API Link to 1CRM

2.3 Adding Customer Connection Features to Your Website

Once you have your *1CRM Customer Connection* plugin installed the next step is to add the portal features you want to the pages of your website. The plugin provides a number of *shortcodes* - special tags that you insert into your pages to display information, as well as a *widget*. The complete set of shortcodes and their descriptions are listed below, and you can also see them using the Usage Guide menu option in the plugin:

The screenshot shows the '1CRM Customer Connection Usage Guide' page in the WordPress admin area. The left sidebar has a '1CRM Customer Connection' section selected. The main content area is titled '1CRM Customer Connection Usage Guide' and contains several sections with descriptions and examples of how to use the plugin's features.

- Help System**: Describes how to organize help system content using one-page or two-page layouts.
- One-page layout**: Explains how to use the [onecrm_kb_articles] shortcode to display topics and articles from the 1CRM Knowledge Base module.
- Two-page layout**: Explains how to use the [onecrm_kb_articles] shortcode on a detail page and the [onecrm_kb_search] shortcode on an index page.
- Dashboard: Information from 1CRM modules**: Shows how to use the [onecrm_p_dashboard] shortcode to display records from various 1CRM modules like Projects, Cases, Bugs, Quotes, and Invoices.
- Subscriptions**: Describes how to use the [onecrm_p_signup] and [onecrm_subscriptions] shortcodes for subscription management.
- Customer Details**: Explains how to use the [onecrm_p_customer_info] shortcode to display customer information.
- Widget**: Describes how to use the 'Customer Connection Customer Info' widget.
- Shortcode**: Provides a detailed list of parameters for the [onecrm_p_customer_info] shortcode, including options for title, show_name, show_login, show_logout, and show_register.

Figure 9: 1CRM Customer Connection - Usage Guide

➡ 2.3.1 Customer Help KnowledgeBase

The 1CRM Customer Connection plugin allows you to display topics and articles from the 1CRM Knowledge Base module. There are two possible ways to organize your help system:

One-page layout

All pages in your Help System will use the same layout. In *Dashboard Settings*, set both *Index Page* and *Detail Page* to *None*. Create a page that will display the Help System content. Normally you will want to add that page to your site's main menu. On that page, place the `[onecrm_kb_articles]` shortcode where you want the content appear. To add a search bar, insert the `[onecrm_kb_search]` shortcode where appropriate.

Two-page layout

With this option, you create two pages. One of them will serve as the *index page* that displays top-level Help topics. On that page, place the `[onecrm_kb_articles]` shortcode where you want the content to appear. To add a search bar, insert the `[onecrm_kb_search]` shortcode where appropriate.

Then create another page that will serve as your *detail page* - it will display sub-topics and articles. On that page, insert the `[onecrm_kb_articles]` shortcode. Do not insert the `[onecrm_kb_search]` shortcode on this page, because the detail page will display its own search input.

In *Dashboard Settings*, set *Index Page* and *Detail Page* to the pages you created in the steps above.

Customize Help KnowledgeBase Appearance

You have a wealth of settings available with which to customize the appearance of Help KnowledgeBase articles within the portal. As you can see in Figure 11 below this includes options for custom CSS code, as well as a range of foreground and background colour settings, drop shadows, borders, etc ..

2.3.2 The Customer Connection Dashboard

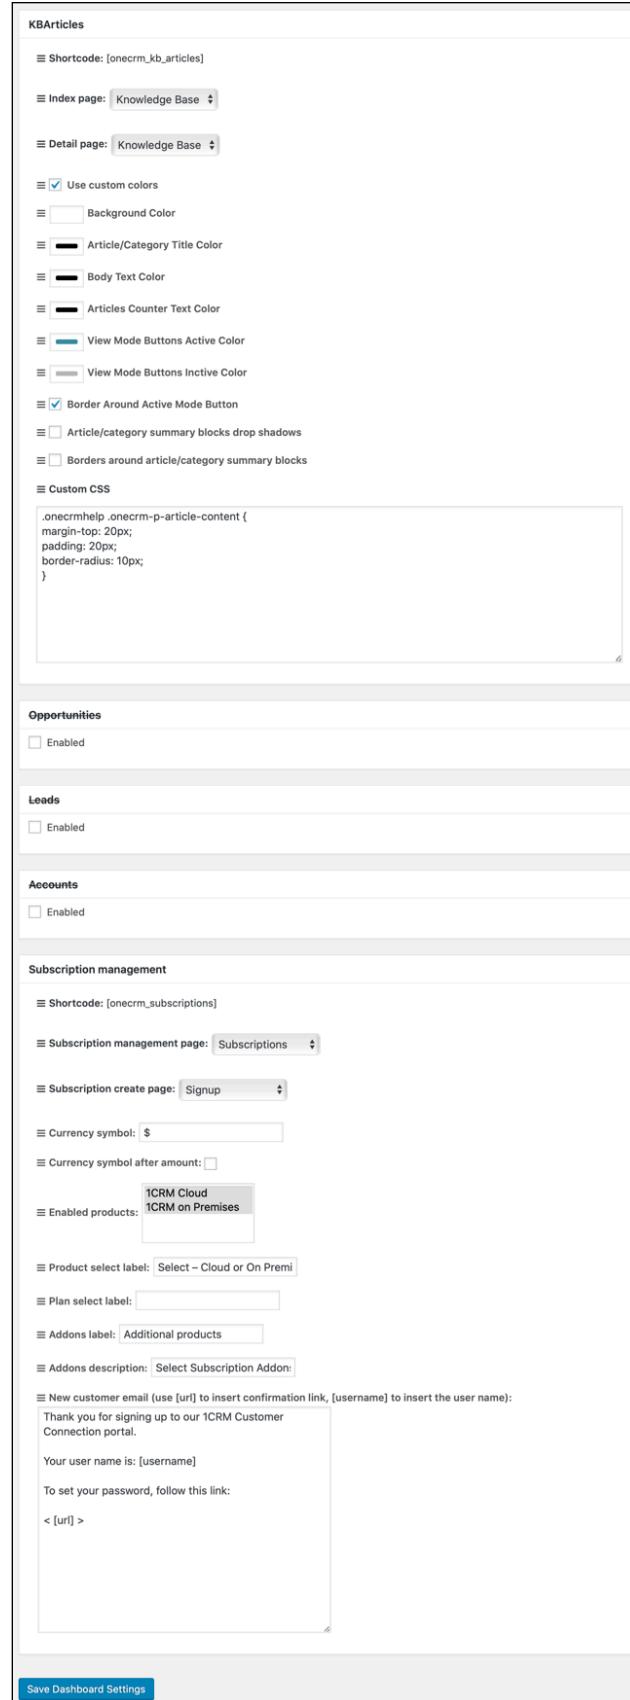

The 1CRM Customer Connection plugin can display information from various 1CRM modules to customers. Currently, the following modules are supported: Projects, Cases, Bugs, Quotes and Invoices. (Opportunities, Leads and Accounts may be displayed for Partner use.) To display a list of records from all the supported modules, simply insert the `[onecrm_p_dashboard]` shortcode into a page.

The screenshot shows the '1CRM Customer Connection Dashboard Settings' page. On the left, there's a sidebar with various WordPress and 1CRM plugin menu items. The main area is divided into sections for different modules:

- Cases**: Enabled. List Fields tab selected. Fields: Date Created, Case Number, Subject, Date-Closed, Category, Status, Priority.
- Software Bugs**: Enabled. List Fields tab selected. Fields: Date Created, Number, Subject, Status, Priority, Type.
- Quotes**: Enabled. List Fields tab selected. Fields: Quote Stage, Quote Number, Quote Subject, Valid Until, Amount.
- Invoices**: Enabled. PayPal Link: <https://www.paypal.com/cg>. List Fields tab selected. Fields: Invoice Number, Invoice Subject, Shipping Status, Due Date, Amount, Amount Due, PayPal Button.
- Projects**: Enabled. List Fields tab selected. Fields: Project Name, Start Date, End Date, Status, Progress (%).

Figure 10: 1CRM Customer Connection Dashboard Settings (Top)

1CRM CUSTOMER CONNECTION

[Save Dashboard Settings](#)

Figure 11: 1CRM Customer Connection Dashboard Settings (Bottom)

1CRM CUSTOMER CONNECTION

Using the *Dashboard Settings* you can enable or disable each of the modules supported in the Dashboard. You can also choose which fields to display on the module *list views* shown in the portal, and which to show in *detail views*, using the checkboxes provided. Use the hamburger icon  on the left to drag fields up and down in the list, to change the order in which they will be presented.

Service Cases and Software Bugs also have a tab for Data Entry Fields - these fields will be available to the user when they choose Create New on the Dashboard, to create a new Case or Bug.

Invoices include controls to optionally show a PayPal button for each open invoice in the portal. Clients can click on the button to pay the invoice. See section 2.3.6 for more information.

2.3.3 Individual 1CRM Modules

You can display information from a single 1CRM module by specifying the "model" parameter in the dashboard shortcode. Use one of the following:

- `[onecrm_p_dashboard model="aCase"]`
- `[onecrm_p_dashboard model="Bug"]`
- `[onecrm_p_dashboard model="Project"]`
- `[onecrm_p_dashboard model="Quote"]`
- `[onecrm_p_dashboard model="Invoice"]`

Note: Do not insert more than one `[onecrm_p_dashboard]` shortcode into a page.

Subscriptions

The 1CRM Customer Connection plugin provides two shortcodes for subscriptions. Insert the `[onecrm_p_signup]` shortcode to display a *Sign up* form that will be used by your site visitors to create a subscription. Use the `[onecrm_subscriptions]` shortcode to render the list view for the current user's subscriptions

After creating the pages with `[onecrm_p_signup]` and `[onecrm_subscriptions]` shortcodes, make sure to open *Dashboard Settings* and set the *Subscription management page* value to the page with the `[onecrm_subscriptions]` shortcode.

2.3.4 Customer Login, Logout and Menu Options

Customer Details

Within different areas of your site you can display information about the customer who has logged in. Customer information is available in two forms: as a widget and as a shortcode.

Widget

1CRM Customer Connection provides a "Customer Connection Customer Info" widget that you can place in any of the widget areas of your site. Available widget areas depend on the Wordpress theme in use. The widget can be configured to display customer name, account name, and/or login/logout/register links. Login and Register links, if enabled, will be displayed to site visitors who are not logged in. The Logout link, if enabled, will be displayed to logged-in users.

1CRM CUSTOMER CONNECTION

You can use multiple instances of the widget in different areas. For example, you may want to display customer name in the footer, and login links in the sidebar. In the Figure below we see two instances of the widget side by side in the footer. The one on the left is configured to show login/logout/register links, while the one on the right is configured to show the customer information.

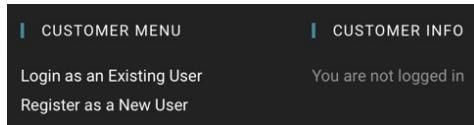

Figure 12: 1CRM Customer Connection - Customer Info Widget

In the next Figure we see the same two instances of the widget after the customer has logged in.

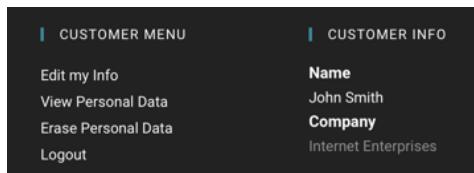

Figure 13: 1CRM Customer Connection - Customer Info Widget

Notice that the logged-in view shows an option to *Edit my Info*. This allows the portal user to edit the information you hold about them in your CRM. And the *View Personal Data* option allows the logged-in user to see and print to PDF their personal data, as defined under the European *General Data Protection Regulations* (GDPR). Similarly *Erase Personal Data* allows you to choose which items of your personal data you'd like erased from the CRM holding your data.

Note: Personal data may be required to continue ongoing services for clients, such as subscriptions, so they should use common sense in terms using the Erase personal Data option.

A screenshot of the 1CRM customer connection interface showing the 'Edit my Info' form. The form fields include: First Name (John), Last Name (Smith), Title (Shift Supervisor), Office Phone (451-277-9891), Home Phone (empty), Mobile Phone (empty), Email (john@internet.com), Other Email (empty), Department (Bottling Operations), Business Role (checkboxes for CEO, CFO, MIS, Sales, Admin, where Admin is checked), Birthdate (2019-09-28), and a 'SAVE' button at the bottom.

Figure 14: 1CRM Customer Connection - Edit my Info

1CRM CUSTOMER CONNECTION

The screenshot shows a CRM interface for viewing personal data. At the top, there's a navigation bar with links: Knowledge Base, Signup, Dashboard, Subscriptions, Quotes, Invoices, Cases, and Projects. Below the navigation is a breadcrumb trail: Dashboard » Contacts » Personal Data. On the right side of the breadcrumb trail is a blue button labeled "DOWNLOAD PDF". The main content area displays a table of personal information:

Business Role CEO	First Name John
Last Name Smith	Title Middle Manager
Department Accounting	Birthdate 2019-09-30
Home Phone 123-456-7890	Email john@smith.com

Figure 15: 1CRM Customer Connection - View Personal Data

The screenshot shows a CRM interface for erasing personal data. At the top, there's a navigation bar with links: Knowledge Base, Signup, Dashboard, Subscriptions, Quotes, Invoices, Cases, and Projects. Below the navigation is a breadcrumb trail: Dashboard » Contacts » Erase Personal Data. The main content area has a heading "Check fields you want to erase" and a list of checked items:

<input checked="" type="checkbox"/> Business Role	CEO
<input checked="" type="checkbox"/> First Name	John
<input checked="" type="checkbox"/> Last Name	Smith
<input checked="" type="checkbox"/> Email	john@example.com

At the bottom left is a blue "ERASE" button.

Figure 16: 1CRM Customer Connection - Erase Personal Data

Shortcode

To display customer information inside a page, add the [onecrm_p_customer_info] shortcode to your page content. The shortcode accepts parameters that control the information displayed by the shortcode:

- [onecrm_p_customer_info title="Customer Details"] — displays a title
- [onecrm_p_customer_info show_name="1"] — displays customer name and company name
- [onecrm_p_customer_info show_login="1"] — displays login link
- [onecrm_p_customer_info show_logout="1"] — displays logout link
- [onecrm_p_customer_info show_register="1"] — displays register link

You can also combine multiple parameters in one shortcode:

- [onecrm_p_customer_info title="Customer Details" show_name="1"] — displays customer name with a title

➡ 2.3.5 Booking Calendar Plugin Integration

The 1CRM Customer Connection portal includes an integration with the WordPress plugin [Booking Calendar](#). This plugin enables website visitors to book and pay for:

- Accommodations (bed & breakfast, cottages, hotel rooms, houses, apartments etc).
- Equipment rentals (cars, bikes, computers, tools, etc).
- Client scheduling (photographers, lawyers, beauty salons, spas, massage therapists).
- Meeting scheduling (coaching, phone advice).
- Event scheduling (conference, course, fitness centre, yoga class, gym).
- Patient scheduling (doctor, dentists, clinic, medical).
- Or any other service which offers reservations for specific day(s).

Note: This integration requires the Business Small or Medium paid edition of this plugin (or higher). This integration is compatible with Booking Calendar version 8.7.2 and WordPress version 5.3.2, or later. You will also need to have an active subscription to 1CRM Enterprise or Professional Edition, Release 8.6 or later.

Once you have installed and configured that plugin within WordPress (see video [here](#)), if you click on the Booking Calendar option of the Customer Connection menu you will see the screen below:

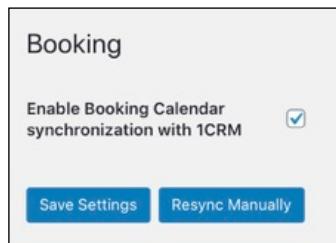

Figure 17: Booking Calendar Synchronization

After you have enabled the synchronization with the Booking Calendar plugin, appointments created in the plugin will be synchronized into 1CRM as Meetings with the checkbox *Booking Appointment* enabled (you can see an example in Figure 19, below, which has the entire new panel of Booking Appointment fields highlighted). In addition, any new Contact or Account information provided will also be synchronized into the CRM, as will any Invoices created. And all these items will be linked to each other for ease of understanding in the CRM.

This sync is one-way, Booking Calendar to 1CRM. Some other sync features include:

- If the client changes the booking time or date using your website, the Meeting in your CRM will be updated.
- If the client removes the booking using your website, the Meeting in your CRM will be deleted.
- If the client changes the Resource booked using your website, the *Booking Resource* field of the 1CRM Meeting will be updated.
- Bookings may be approved or deleted in WordPress, and the *Booking Status* in 1CRM updates appropriately.

1CRM CUSTOMER CONNECTION

- When using the *wpadmin* features for the Booking Calendar, if a Note is added to a Booking, that Note will be added as a Note in 1CRM, linked to the Meeting record.
- When editing the Contact for a Booking in WordPress, updating any info other than the email address causes the appropriate update in 1CRM. Changing the email address, or using a different Contact in WordPress causes a new Contact to be linked to the Meeting in 1CRM.

The WordPress scheduler is used to run the synchronization software within the portal which performs the various tasks described above which synchronize data to 1CRM. If you wish you can also use the *Resync Manually* button to perform a manual sync independent of the WordPress scheduler.

Within 1CRM, the Meetings list view screen has a filter on it for *Bookings Only*. Click this to show only Booked Appointments on the Meetings list view. You can also search in the text box for *Booking* to show these special meetings.

On the 1CRM Calendar, using the Day, Week or Month tabs, and the Activities mode, you have a checkbox for Bookings, which will enable you to see just the Meetings which are Booking Appointments on your calendar.

The screenshot shows a booking calendar interface for Raincoast SPA Services. At the top, there's a navigation bar with links for Knowledge Base, Subscription Signup, Register as a User, Booking, Shop, and a user icon. Below the navigation is a title 'Raincoast SPA Services' and a dropdown menu labeled 'Select service' with 'RMT: Danielle Ronin (\$95/hour)' selected. The main area features a monthly calendar for January 2020. The days of the week are labeled SU, MO, TU, WE, TH, FR, SA. The days of the month are numbered 1 through 31. A legend at the bottom of the calendar indicates four booking statuses: Available (dark blue), Booked (orange), Pending (light blue), and Partially booked (green). To the right of the calendar, there's a 'Select Times:' field containing '13:00 - 14:00'. Below it are fields for 'First Name (required):' (containing 'John'), 'Last Name (required):' (containing 'Smith'), 'Email (required):' (containing 'john@1crm.com'), 'Phone:' (containing '1-778-432-2761'), and a 'Details:' text area with the note 'Focus on my left triceps please!'. At the bottom, there's a checkbox for 'I agree to terms and conditions' (checked), a CAPTCHA field with the text 'AHWZ', and a 'SEND' button.

Figure 18: Booking Calendar Plugin for WordPress

1CRM CUSTOMER CONNECTION

We see below a sample Meeting record created in 1CRM via the Customer Connection portal's Booking Calendar integration. Notice the Booking Appointment toggle is enabled, to indicate that this Meeting is a Booking. This enables the display of several more data fields relevant only to Booking Appointments, such as *Booking Status* and *Payment Status*.

Also notice the Account name format - Lastname, Firstname. This is the default format for Account names created when the portal user provides no company name when creating their WordPress user. Finally note the *Related to* value - which links to the Invoice created for the Booking, and the Resources sub panel which shows the Resource booked for this appointment. (**Note:** Resources created within the Booking Calendar plugin and then used for a Booking are created automatically within 1CRM if they do not already exist there.)

The screenshot shows the 1CRM Customer Connection portal interface. The top navigation bar includes 'Sales & Marketing', 'Order Management', 'Project Management', 'Customer Service', and 'Reports & Settings'. The main content area displays a 'Meetings' record titled 'Booking Appointment: Massage'. The record details include:

- Booking Appointment:** Focus on left triceps please!
- Start Date & Time:** Wednesday, 09:00
- Duration:** 1h 00m
- Location:** [empty]
- Display Reminder:** 5 minutes prior
- Related to:** 2020-44: Booking Appointment: Massage
- Account:** Ivanenko, Alex
- Private:** Yes
- Email Reminder:** No reminder

A red box highlights the 'Booking Appointment' section, which contains:

- Booking Status:** Pending
- Booking Resource:** RMT - Danielle Ronin
- Payment Status:** 157833749116.14
- Cost:** \$ 95.00

Below the main record, there are sub-sections for Participants, Resources, and Notes.

Figure 19: Meeting Created in 1CRM from Booking Calendar Integration

All meetings created in the CRM will be assigned to the 1CRM User you selected in section 2.2.1 above, when creating the new API client for your Customer Connection portal.

Depending on the nature of the Bookings you are accepting via the Booking Calendar plugin, your Resources might actually be people - such as Massage therapists, Spa Technicians, Plumbers, or

1CRM CUSTOMER CONNECTION

field service engineers. (Or they might be Airbnb properties, Meeting Rooms, or other resources that aren't people, in which case you can ignore this section!)

If your Resources are people, more specifically employees who login to your 1CRM system, then you will find it almost essential that new Meetings created via the Booking Calendar integration should be assigned to those specific 1CRM Users, so they can see all their appointments in their Calendar. In the Figure below you can see how your 1CRM Administrator can define Workflows to reassign new Booking-type Meetings to the appropriate Users. Each employee will need a Workflow like the one shown above.

Basically the Workflow says: When a new Meeting is Created, and if it is a Booking Appointment, and if the Booked Resource is Employee A, then change the *Assigned To* value for that Meeting to Employee A, so they know the Meeting is for them and can see it in their Calendar.

The screenshot shows the 1CRM System ENT-8.5.12 interface with the title 'Booking Calendar Testing (5U)'. The top navigation bar includes 'Search', 'Wednesday January 8, 2020', '43', and 'admin'. Below the navigation is a menu bar with 'Today's Activities', 'Sales & Marketing', 'Order Management', 'Project Management', 'Customer Service', 'Reports & Settings', and the '1 CRM' logo. The main content area displays a 'Workflow – Change Assigned User for Scheduled Appointments' configuration screen. The workflow details are as follows:

- Name:** Change Assigned User for Scheduled Appointments
- Status:** Trigger Module: Inactive
- Trigger Action:** Saved
- Applies to:** New Record Only
- Execute as:** User who triggers workflow

Conditions:

Field	When	Filter
Booking Appointment	Check current value	Yes
Booking Resource	Check current value	RMT - Danielle Ronin

Actions:

- 1. Update Current Record**
 - Perform when: After the trigger event
 - Field Updates: Assigned to: dronin

At the bottom of the workflow screen are 'Save' and 'Cancel' buttons.

Figure 20: Reassigning Meetings via Workflow in 1CRM

➡ 2.3.6 Adding a PayPal Button to Pay Invoices

The 1CRM Customer Connection portal offers the ability to include PayPal payment buttons for open invoices. It is configured using these controls:

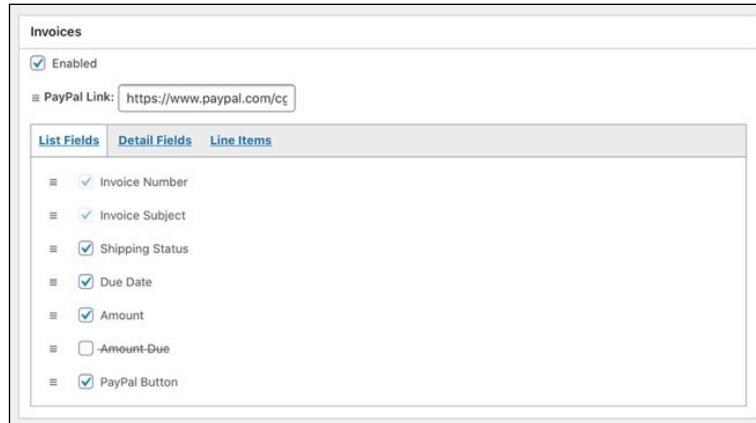

Figure 21: Adding a PayPal Button to Invoices

The PayPal link is the same link you can add inside 1CRM, to add PayPal buttons to an Invoice PDF to be sent to clients. To generate this link, in your PayPal account, create a simple website *Buy Now* Saved Button with no item or pricing information. Then click the Email tab and copy the link and paste it here in the PayPal link field, then Save. This link should be of the format: https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=BUTTON_ID_HERE.

Once you have added the PayPal Link, then check the PayPal button field - you can check it for List Fields, Detail Fields or both. Here are examples of Invoices list view and detail view to show what the button looks like:

INVOICE #	INVOICE SUBJECT	DUE DATE	AMOUNT	AMOUNT DUE	PAYPAL
2020-22	Booking Appointment: Facial: Amanda Strong (\$95/hour)	2020-01-16	\$95.00	\$95.00

Figure 22: Invoice List View with PayPal Buttons

1CRM CUSTOMER CONNECTION

The screenshot shows the 1CRM customer connection interface. At the top, there's a navigation bar with links for Knowledge Base, Signup, Dashboard, Subscriptions, Quotes, Invoices, Cases, Projects, Booking, Shop, and a user icon. Below the navigation is a section titled "Invoices". It displays an invoice for "Annual Services Renewal" with an invoice number of 2019-16 and an amount due of \$22.00. A "PayPal" button is present. Below the button is a table showing the item details: "1CRM on Premises" with a quantity of 1, unit price of 222.00, and ext. price of 222.00. A "Totals" section shows Subtotal: 22.00 and Total: 22.00. Below the totals are sections for "Notes" (No records to display) and "Payments" (a table showing one payment record with ID:22, method: PayPal, amount: \$200.00, and date: 2020-06-06).

Figure 23: Invoice Detail View with PayPal Button

When your client clicks on the PayPal button, they will see a PayPal payment window like this:

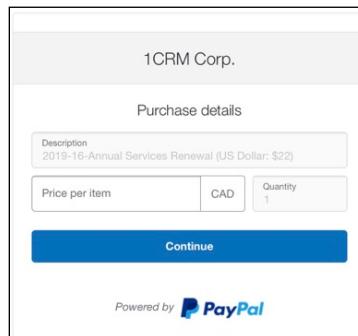

Figure 24: PayPal Payment Popup Window

The description of the item in this popup is set to include your invoice number and subject, as well as the amount due (and its currency). Your client simply enters the amount they wish to pay, and clicks on *Continue*. They will then continue to a screen such as the one below, and complete the payment. (Note the option to pay by Credit Card - no PayPal account required.)

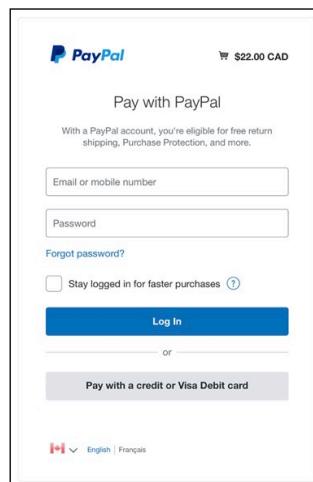

Figure 25: PayPal Payment Process

3.0 The User Experience

3.1 *What the Casual Visitor Sees*

A casual visitor is someone who is on your website but has not logged in. These visitors may see the Help KnowledgeBase information, but may not see the Dashboard or information from individual modules.

3.2 *Customer Login & Profile Update*

Once a visitor has logged in and been recognized as a client, the Customer Connection portal will display information to them for which they are authorized. This includes:

- Cases: Cases for which the user's CRM Contact is the Primary Contact on the Case.
- Bugs: Bugs for which the user's CRM Contact is the Primary Contact on the Software Bug.
- Projects: Projects for the Account which is the primary Account for the user's CRM Contact
- Quotes: Quotes for the Account which is the primary Account for the user's CRM Contact
- Invoices: Invoices for the Account which is the primary Account for the user's CRM Contact
- Subscriptions: Subscriptions for the Account which is the primary Account for the user's CRM Contact

A new visitor will need to register by creating a Portal user. This Portal user (actually, a WordPress user) will be linked to their Contact record in the 1CRM system linked to the Portal.

The screenshot shows a registration form for a WordPress site. At the top is the WordPress logo. Below it is a heading 'Register For This Site'. The form consists of several input fields: 'Username', 'Email', 'Company Name', 'First Name', and 'Last Name'. A note below the fields states 'Registration confirmation will be emailed to you.' At the bottom right of the form is a blue 'Register' button. At the very bottom of the page, outside the main form, are links for 'Log in | Lost your password?' and '← Back to 1CRM Customer Connection'.

Figure 26: 1CRM Customer Connection - User Registration

1CRM CUSTOMER CONNECTION

Once completed, the registration form above will create a WordPress user. It will also create a new Contact and Account in the linked CRM. If the email address provided matches that of an existing CRM Contact, then no new Contact and Account is created, and the WordPress user is simply linked to the existing Contact/Account in the CRM.

A visitor who has already registered simply needs to login. The login process requires the visitor to click on the link *Login as an Existing User*:

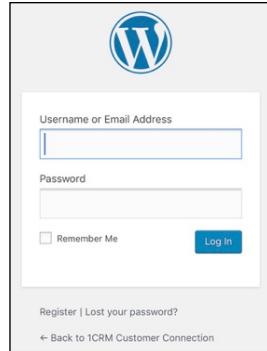

Figure 27: 1CRM Customer Connection - Login as an Existing User

Once registered and logged in a Portal user can update their own personal information inside the 1CRM system, or perform GDPR functions to request to see or erase their personal information in the linked CRM. These functions will appear on the Customer Menu offered by the Customer Info widget in an updated portal release coming soon:

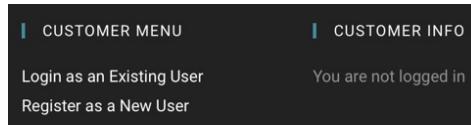

Figure 28: 1CRM Customer Connection - Updating Contact Information

3.3 *Customer Help KnowledgeBase*

If you have the 1CRM Customer Connection installed on a WordPress site the Help KnowledgeBase capability within it will look something like the Figure below:

1CRM CUSTOMER CONNECTION

The screenshot shows the 1CRM Customer Connection Help System. At the top, a teal header bar features the text "How can we help you today?" and a search bar labeled "Search...". In the top right corner, there is a grid/list view switcher icon. Below the header, the page is divided into several sections, each containing a title, a brief description, and a count of articles or topics:

- Customization**: Info on all the many ways you can customize 1CRM using the Studio features in Administration. 2 Articles.
- Documentation**: All the latest documentation for 1CRM 8.5. The User Guide, Implementation Guide, Developer Guide, Mobile User Guide plus the QuickStart Checklist. 5 Articles.
- General**: General info about your 1CRM system. 2 Articles.
- Getting Started**: Answering your most common questions about how to get started with 1CRM. 17 Articles.
- Products by 1CRM Systems**: Details on the products produced by 1CRM Systems Corp.: 1CRM for CRM and Business Management; Lead Guerrilla for Marketing Automation; and 1CRM Customer Connection – a WordPress Plugin which provides a customer self-service portal. 3 Topics, 1 Article.
- Startup Edition**: 1CRM offers a Startup Edition specifically for early stage companies. This topic covers your most common questions about this free On Premise version of 1CRM. 5 Articles.
- Videos**: The 1CRM Video Channel features videos on all the core topics you want to learn about! 4 Articles.

Figure 29: 1CRM Customer Connection - Help System

Note: If there are Documents or Notes linked to Help Articles they will be accessible by customers in the portal if the Article is displayed there.

Portal visitors can navigate the Help system by clicking on Topics or Articles. A breadcrumb trail is displayed at the top left, as seen below. A control at the top right is available to select grid or list view format.

The screenshot shows the 1CRM Customer Connection Help Center. At the top, a teal header bar displays the title "1CRM Help Center". Below the header, a breadcrumb trail shows the path: "Topics > Products by 1CRM Systems". To the right of the breadcrumb trail is a search bar and a grid/list view switcher icon. The main content area is organized into two main sections: "Topics" and "Articles".

Topics

- 1CRM - CRM & Business Management**: Summary information about our flagship CRM product - an All-in-One CRM which includes Order Management, Service Management and Project Management in addition to conventional Sales and Marketing capabilities. 1 Article.
- 1CRM Customer Connection: WordPress Portal**: Introductory information about the 1CRM Customer Connection self-service customer portal - a WordPress plugin. 1 Article.
- Lead Guerrilla: Marketing Automation**: Summary information about our advanced Marketing Automation product - Lead Guerrilla. It has been carefully designed to integrate seamlessly with 1CRM to create a powerful CRM and Marketing Automation duo. 1 Article.

Articles

- 1CRM Products Overview**: An overview of all of the products from 1CRM Systems Corp.

Figure 30: 1CRM Customer Connection - Navigating the Help System

1CRM CUSTOMER CONNECTION

The screenshot shows the 1CRM Help Center interface. At the top, there's a navigation bar with the title "1CRM Help Center". Below it, a breadcrumb trail reads "Topics » 1 Products by 1CRM Systems". A search bar contains the word "management". To the right of the search bar is a "Search..." button. The main content area is titled "Topics" and lists three articles:

- 1CRM - CRM & Business Management**: Summary information about the flagship CRM product. It includes Order Management, Service Management, and Project Management in addition to conventional Sales and Marketing capabilities. (1 Article)
- Lead Guerrilla: Marketing Automation**: Summary information about the advanced Marketing Automation product. It has been carefully designed to integrate seamlessly with 1CRM to create a powerful CRM and Marketing Automation duo. (1 Article)
- 1CRM Products Overview**: Introductory information portal - a WordPress plugin. An overview of all of the products from 1CRM Systems Corp. (1 Article)

A sidebar on the right shows a search result for "management", listing articles like "What is CRM? GETTING STARTED", "1CRM Products Overview PRODUCTS BY 1CRM SYSTEMS", and "Is 1CRM an Open Source CRM System? GENERAL".

Figure 31: 1CRM Customer Connection - Searching the Help System

As shown above, users can also click in the Search box and get dynamic feedback on matches as they enter their search text. The results are shown in a scrollable list, with each entry showing the Article subject, the Topic it falls under, and the first portion of the Article Summary text. Simply click on any result in the list to read that Article.

The screenshot shows the 1CRM Help Center displaying the "1CRM Products Overview" article. The page has a header "1CRM Help Center" and a breadcrumb trail "Topics » 1 Products by 1CRM Systems » 1CRM Products Overview". On the right, there's a "Search..." button. The main content area starts with a section titled "1CRM Products Overview" with a summary: "An overview of all of the products from 1CRM Systems Corp.". It then lists "1CRM offers three core products:" followed by a bulleted list:

- 1CRM - CRM & Business Management - An 'all-in-one' Customer Relationship Management (CRM) with Business Management features included.
- Lead Guerrilla: Marketing Automation - An advanced Marketing Automation Platform (MAP) which can integrate with 1CRM, or alternatively with Salesforce.com, SugarCRM, or several other CRM systems.
- 1CRM Customer Connection: WordPress Portal - A self-service customer portal which installs as a plugin for WordPress websites.

Below this, it says "1CRM also offers a series of supporting products:" followed by another bulleted list:

- 1CRM Mobile App for iOS
- 1CRM Mobile App for Android
- Plugins for WordPress, Joomla!, Drupal and TYPO3 to implement lead capture forms which send lead data into 1CRM or Lead Guerrilla.

Figure 32: 1CRM Customer Connection - Reading an Article in the Help System

3.4 The Customer Connection Dashboard

The Dashboard will be displayed as several lists of information from the modules selected in Dashboard Settings (see Section 2.3.2), similar to the Figure below.

1CRM Portal Test			
Software Bugs			
BUG #	SUBJECT	STATUS	PRIORITY
7	Sample Bug	NEW	Medium

Figure 33: 1CRM Customer Connection - Dashboard

1CRM CUSTOMER CONNECTION

Users can click on a section title such as Cases, Bugs or Projects to see a list of just those items, or they can click on any item from any of the lists shown to see more detailed information:

The screenshot displays the 'Cases' detail view in the 1CRM Customer Connection. At the top left is a breadcrumb trail: 'Dashboard » Cases'. The main content area is titled 'Case Number' with value '13'. Below it are sections for 'Status' (set to 'ASSIGNED'), 'Category' ('Website'), and 'Date Closed'. A 'Description' section contains a note about implementing the 1CRM Customer Connection on a client's website. The 'Contacts' section lists one contact, Andrey Demenev, with his email address. The 'Notes' section shows a single note titled 'Sample Note' with the content 'Note with PDF attachment'. This note has an attachment named 'Competing with the Big Guys - Blog Article.pdf'. At the bottom of the notes section is a button labeled 'Add Note'.

Figure 34: 1CRM Customer Connection - Viewing a Case

The Add a Note button may be used to add a Note to a Case, Bug or Project. These Notes may include an uploaded file. Users may download file attachments from any Note linked to a Case, Bug or Project.

The screenshot shows the 'Add Note' form. It has a 'Note title' field containing 'Sample Note'. There is an 'Attachment (optional)' section with a 'Choose File' button and a preview for 'Competing with the Big Guys - Blog Article.pdf'. The 'Details' section contains the note content 'Note with PDF attachment'. At the bottom right is a 'Save Note' button.

Figure 35: 1CRM Customer Connection - Adding a Note

Users may also use the *Create New* buttons provided on the Dashboard to add new Software Bugs or Service Cases.

3.5 Customer Support Cases

Portal users may view a list of service Cases, select a Case to see more detailed information, add a Note to a Case, or create a new Case. Example screens are shown above.

In Figure 34 above notice the breadcrumb trail at the top left. In **Dashboard » Cases** you can click on **Dashboard** to go all the way back to the full Dashboard view, or simply click on **Cases** to return to the Cases list view from the Cases detail view.

3.6 Project Tracking & Interaction

Portal users may view a list of Projects, select a Project to see more detailed information or add a Note to a Project.

Example screens are shown below. You can see an example of pagination in a list view.

Figure 39: 1CRM Customer Connection - Bug Detailed Info

3.8 Subscription Management

Portal users may view a list of Subscriptions, Create a new Subscription, or select a specific Subscription to see more detailed information, by clicking on the *Edit* link to the right of it.

DETAILS		RENEWAL STATUS	
Barney Rubble - 1CRM Cloud: Enterprise Edition, Annual Plan Users: 9 Addon: Dedicated Virtual Machine Current term start: 2019-07-26 Current term end: 2020-07-26		Active	Edit

Figure 40: 1CRM Customer Connection - Subscription List View

The Subscription edit view allows the customer to make changes to their subscription.

Figure 41: 1CRM Customer Connection - Subscription Detailed Info

1CRM CUSTOMER CONNECTION

If a portal visitor who is not logged in chooses the Signup menu option to sign up for a new subscription, the workflow goes like this (the [1crm.com](#) Signup form is used as an example):

The screenshot shows the 1CRM customer connection interface for a new subscription. On the left, there's a sidebar with '1 CRM' logo, 'Knowledge Base', 'Subscription Signup', and 'Register as a User'. The main form has sections for 'Select - Cloud or On Premise' (set to '1CRM Cloud'), 'Plan' (set to '1CRM Cloud: Enterprise Edition, Annual Plan' for 8 users at \$3264.00), 'Additional products' (with 'Lead Guerrilla Marketing Cloud' and 'Customer Connection Portal (WordPress Plugin)' selected), 'Options' (with 'Site Name' set to 'mycompany.1crmcloud.com'), and 'Customer details' (radio button for 'I am a new customer' selected, email 'frank@1crm.com', user name 'Frank', first name 'Frank', last name 'Sinatra', company name 'The Rat Pack'). A 'REGISTER ME & CONTINUE' button is at the bottom.

Figure 42: 1CRM Customer Connection - Subscription by Unregistered Visitor, Part 1

The client chooses the details of their subscription - the Product, Plan and Addons - and specifies any Options (such as site name in our case). Then the client selects *I am a New Customer*, and provides their email address, user name, first and last name, and company name - and clicks on *Register Me and Continue*. (Duplicates of user names or email addresses are rejected.)

The screenshot shows the same 1CRM customer connection interface after the registration process. The 'Customer details' section now includes a message: 'User account created. Email sent for account confirmation and password creation. Click the link in the email to confirm your email address and continue the subscription process.' The rest of the form fields are identical to Figure 42.

Figure 43: 1CRM Customer Connection - Subscription by Unregistered Visitor, Part 2

They are then added as a WordPress user, and as a Contact and Account in the linked CRM. An email is sent to them immediately, which they should open right away, and then click on the link in it to be directed to a screen where they set their password as shown in the Figure below:

1CRM CUSTOMER CONNECTION

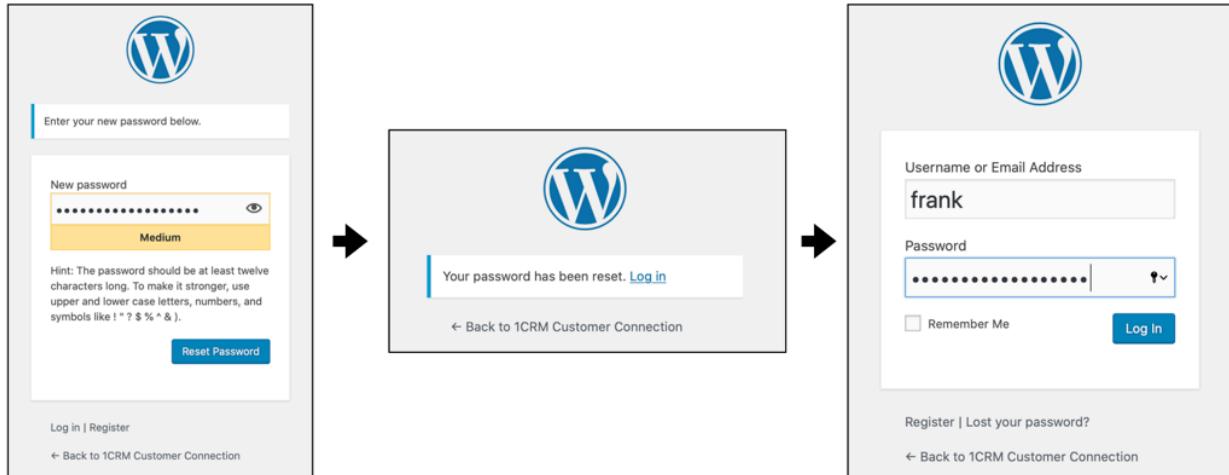

Figure 44: 1CRM Customer Connection - Subscription by Unregistered Visitor, Part 3

As seen above, the user enters their new password, then clicks on *Reset Password*. Then they see the dialog box telling them that their password has been reset, with a link they click to *Login*. Then they see the Login form, fill that in, and then they are returned to the Signup form with their subscription selections and their customer details displayed as shown below, and they proceed to establish a Payment method.

The screenshot shows a subscription form for "1CRM" with the following sections:

- Select – Cloud or On Premise:** A dropdown menu set to "1CRM Cloud".
- Plan:** A dropdown menu set to "1CRM Cloud: Enterprise Edition, Annual Plan". Below it, a field shows "8" users and a price of "\$3264.00".
- Additional products:** Options include "Lead Guerrilla Marketing Cloud" (checked), "Customer Connection Portal (WordPress Plugin)" (checked), "Dedicated Virtual Machine" (unchecked), and "Additional Data Storage" (unchecked).
- Options:** A field for "Site Name" containing "mycompany". Below it, a note states "This will be the URL to access your CRM".
- Customer details:** Fields for "Email address" (frank@1crm.com), "First name" (Frank), "Last name" (Sinatra), and "Company name" (The Rat Pack).
- Payment method:** A note says "No cards on file". A "MANAGE PAYMENT METHODS" button is present.
- Buttons:** "CREATE SUBSCRIPTION" at the bottom right and "MANAGE PAYMENT METHODS" in the middle right.

Figure 45: 1CRM Customer Connection - Subscription by Unregistered Visitor, Part 4

When the client clicks on Manage Payment Method, a popup box is displayed on top of the subscription page, as seen below. The client enters their card information, then clicks on *Add*. When the client has added one or more Payment methods, they can click on *Done* → to return to the main Subscription form, where they select the active Payment method radio button, and then click on *Create Subscription*.

Figure 52: 1CRM Customer Connection - Invoice Detailed Info

3.11 Partner Portal Access

The 1CRM Customer Connection provides additional capabilities to users who are also associated with Partners within the CRM. Let's recap:

- Each 1CRM Customer Connection user is a WordPress user
- That WordPress user is linked to a Contact in the 1CRM core system
- In 1CRM, each Partner is associated with an Account
- Each Partner has a list of *Authorized Contacts*

If one of a Partner's Authorized Contacts logs in as a WordPress user, they will be able to view those Accounts, Opportunities and Leads which are shown in the CRM as linked to that Partner record.

Accounts, Opportunities and Leads displayed are limited to those Accounts for which the contact is an authorized contact.

1CRM CUSTOMER CONNECTION

Customer Portal Plugin for WordPress

The image shows a smartphone on the left and a laptop on the right, both displaying the 1CRM Customer Connection website. The smartphone screen shows a mobile-optimized interface with a teal header, a search bar, and sections for 'Customization', 'Documentation', 'General', 'Getting Started', 'Products by 1CRM Systems', 'Startup Edition', and 'Videos'. The laptop screen shows a desktop version with a similar layout but includes a navigation bar at the top with links like 'Knowledge Base', 'Signup', 'Dashboard', 'Subscriptions', 'Quotes', 'Invoices', and 'Cases'.
